CAREER OBJECTIVE

Motivated and detail-oriented Computer Science and Engineering (CSE) graduate with strong expertise in Python and Django backend development, complemented by a solid foundation in software engineering, database management, and machine learning. Experienced in designing, developing, and deploying scalable web applications using modern development practices. Seeking an internship or entry-level software engineering position to leverage technical skills, contribute to innovative projects, and grow as a backend developer while delivering reliable and efficient software solutions.

PROJECTS

Quiz Portal (Django):

→ quiz-portal-kq6a.onrender.com

Developed a Django-based Quiz Portal with secure authentication, role-based access, quiz management, automated scoring, and participant ranking.

ManageCash django:

→ <https://managecash-django.onrender.com>

A Django-based personal cash management web application featuring user authentication, income and expense tracking, transaction history management, and a financial dashboard using Python, Django, SQLite, HTML, CSS, and Bootstrap.

Crop Pest & Disease Detection System (Machine Learning)

→ Built a CNN-based image classification model for crop pest and disease detection using TensorFlow, Keras, and OpenCV.

Email OTP Verification

→ generate-otp-to-mail.vercel.app

Developed a full-stack email OTP authentication system using HTML, CSS, JavaScript, Node.js, Express.js, Nodemailer, and Gmail SMTP with expiry-based OTP validation and REST API integration.

Job Portal django:

→ <https://managecash-django.onrender.com>

A full-stack Django web application that connects employers and job seekers, allowing recruiters to post jobs, manage applications, and hire candidates, while job seekers can create profiles, apply for jobs, upload resumes, and track their application status through a secure and user-friendly interface.
